## FULL STACK WEB DEVELOPER

[Portfolio URL](#)  
[GitHub](#) | [LinkedIn](#)

*Knowledgeable in front-end and back-end development, responsive frameworks, databases, and best practices.*

I'm a full stack web developer mastering the MERN stack. Building elegant solutions to unwieldy problems is what fuels my creativity and drives me to produce clean and high performing applications. My interests in programming revolve around application performance and efficiency. My objective is simply to be the best developer I can be and continue to contribute to the tech industry by learning can about development. As a firm believer that teamwork is the secret that makes common people achieve uncommon results, I can hardly wait to bring all that I have to the table.

## SKILLS

- **Front End:** JavaScript ES5/ES6, HTML5, CSS3
- **Frameworks:** React, Redux, jQuery, Mocha
- **Languages:** JavaScript ES5/ES6, Python
- **Database:** MongoDB, PostgreSQL
- **Server Side:** NodeJS, NPM, REST APIs, ExpressJS
- **Task & Project Management:** Git, GitHub
- **Other:** NPM, Responsive design and implementation
- **General:** Written & verbal communication, project management, Microsoft Office products.
- **Bilingual:** English and Spanish

## EXPERIENCE

### FULL STACK WEB DEVELOPER

4/2018-Present

Acceptable Losses: [Demo](#) | [Client](#) | [Server](#)

- With our app, users can keep track of all of their bills, see due dates of upcoming bills, and click a button to visit a bill's payment website and mark them as paid. Staying on top of expenses is as easy as hitting a button!
- Full stack app built with HTML5, CSS3, JavaScript, React, Redux, NodeJS, ExpressJS and MongoDB. Uses APIs from Cloudinary, Nivo, Big Calendar, Cron, NodeMailer, and Moment.

GameStrat: [Demo](#) | [Client](#) | [Server](#)

- GameStrat is designed to allow users to share their tricks and hints on how to overcome obstacles any game. Registered users will be able to add strategies to their favorite games as well as manage and keep track of all of their strategies.
- Full stack app built with HTML5, CSS3, JavaScript, React, Redux, NodeJS, ExpressJS and MongoDB. Uses API from IGDB.

Cartas Contra Español: [Demo](#) | [Client](#) | [Server](#)

- Cartas Contra Español is a language learning app that uses spaced repetition. If the user translates the word correctly it will be pushed further down the list. If they get the translation wrong, they will see the word more often until they answer it correctly.
- Full stack app built with HTML5, CSS3, JavaScript, React, Redux, NodeJS, ExpressJS and MongoDB.
